Supported Decision Making Project

This project is about helping people make decisions.

Making decisions

People make lots of decisions…

- what to eat
- where to live
- how to spend their money

It is important for people to make their own decisions.

It gives them control over their life.
Supported Decision Making

Some people make decisions on their own.

Some people need help to make decisions.

This is called **Supported Decision Making**.

The law says that people with disabilities have the right to...

- make their own decisions
- have help to make decisions
• say what they want to do

• be protected from any risks

This project wants to...

• help people make their own decisions

• help people make decisions about money

• train staff and carers so that they can help people make decisions
